OTR*	£40,225.00

Finance.

BMW Financial Services offers you a choice of car finance options to help you get behind the wheel of a new or used BMW. At every BMW Centre, you'll find a BMW Financial Services specialist who can talk you through the options we can provide. These will depend on whether you want the option to own the car at the end of the agreement or just lease it. The difference will be explained to you to help inform your decision. Once you've chosen the finance package that suits you and your budget, we'll do the rest. From paperwork and phone calls to delivery arrangements, we'll handle all the details and do everything to get you on the road as quickly and easily as possible.

* The recommended on the road cash price includes delivery, BMW Emergency Service, number plates, first registration fee, vehicle excise duty and 20% VAT. All of the content has been put together with the greatest possible care. Despite this, BMW (UK) Ltd cannot be held liable for the information and prices contained being free of errors, correct, and accurate. No guarantee can be provided nor liability accepted.

[2] The figures for fuel and energy consumption were determined according to the new Worldwide Harmonised Light Vehicle Test Procedure (WLTP). For CO2 emissions, the values shown are the figures which were translated back to the old NEDC equivalent. Until 6th April 2020, only the NEDC equivalent CO2 figure will be used to calculate the Vehicle Excise Duty in the UK. Figures are for comparison purposes and may not reflect real life driving results which depend on a number of factors including the starting charge of the battery, accessories fitted (post registration), variations in weather, driving styles and vehicle load. For plug-in hybrid vehicles they were obtained using a combination of battery power and fuel, for battery electric vehicles after the battery had been fully charged. Plug-in hybrid and battery electric vehicles require mains electricity for charging. More information on the WLTP test procedure can be found here: <https://www.bmw.co.uk/discover-bmw/technology/efficientdynamics/consumption-and-emissions>

The CO2 figures were translated back to the outgoing test (NEDC) and will be used to calculate vehicle tax on first registration. Only compare fuel consumption, CO2 and electric range figures with other cars tested to the same technical procedure.

A guide on fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. For further information you can also visit:

<https://www.gov.uk/co2-and-vehicle-tax-tools>

These figures are for the basic model with the transmission offered in the basic version. They are determined using the prescribed measuring methods (Directive 80 / 1268 / EEC in its current version). They do not relate to any one particular vehicle, nor are they part of any offer made, rather they are solely for the purpose of comparing different kinds of vehicle.
